# How much does it cost to install photovoltaic panels on a ship

## Overview

---

An estimated system for vessel installation price is set to \$2.8 to \$3.4 (USD) per watt, meaning that an installation of 150 kW would cost from \$420,000 to \$450,000 (USD). How much does it cost to install solar panels on a boat?

Prices start at £70 for the smallest panels, which are typically 30 watts. You can expect to pay several hundred pounds for panels that are 100 watts and over, meaning if you live on your boat and use a lot of electricity, you'll be looking at paying between £500 and £1,000, depending on how many panels you need.

How many solar panels do you need for a boat?

Head to our solar panel costs page for more information. How many marine solar panels do you need for your boat?

The general rule of thumb is 100 watts for every 10 feet of boat, but this will differ depending on how much power you expect to use. This handy table will give you a rough idea of how much power common boat appliances consume:

How long does it take to install marine solar panels?

Installing either flexible or rigid marine solar panels will typically take a day, but could take as many as three depending on the complexity of your setup. Getting a qualified professional to install your solar panels will reduce the time it takes, even if you're confident installing them yourself.

Are marine solar panels worth it?

Marine solar panels can give you more freedom to explore without having to refuel, making it worth paying solar panel prices for the ability to run all your gear with just sunlight. You can even use solar energy to power the engines of some boats, letting you cruise the high seas indefinitely.

Can a solar panel be installed on a boat?

Installing a solar panel on a boat can sound daunting, but it's actually a lot more straightforward than it might appear. The hardest part is deciding where to put your solar panel; as all boaters know, space (especially deck space) can be precious even on large vessels, so this may take some planning.

Do you pay for solar power at the dock?

If you normally pay for power at the dock, the savings can potentially add up! A basic solar power installation will consist of 3 things: the solar panel (s), a solar charge controller, and your battery bank. The solar panel (s) will be wired to the charge controller, and the controller will be wired to your batteries.
