How to best disinfect photovoltaic panels

Overview

How to clean solar panels effectively?

Now that you have everything you need, let's dive into the step-by-step guide for cleaning solar panels effectively. Timing is crucial when cleaning solar panels to ensure optimal results and safety. It's best to clean them early in the morning or late afternoon when the sun's rays are less intense, and the panels are cooler to the touch.

Do solar PV panels need to be cleaned?

That said, most solar pv panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

What is the best thing to clean solar panels with?

It's typically best to use a long-handled roof brush, soft-bristle brushes, and plastic-blade squeegees to clean solar panels, as they're gentle and won't scratch or damage the panels. Attach shorter brushes or squeegees to a long pole for hard-to-reach areas.

Is it safe to clean solar panels from the ground?

Yes, and it's much safer than attempting to climb a ladder. Here's a step-by-step guide to cleaning your solar panels from the ground: 1. Switch off the entire solar PV system. Your solar PV system manual will tell you how to do this. 2.

When should I clean my solar panels?

Optimal timing: Clean your solar panels in the early morning or late afternoon when they are cooler. This prevents water from evaporating too quickly, which can leave streaks or residue and affect efficiency. Cooler panels are also safer to clean. Check warranty: Review your solar panel manufacturer's warranty guidelines before cleaning.

Do you need a professional solar panel cleaner?

Hiring a professional solar panel cleaner is the best way to give rooftop panels a really thorough cleanse, but you can do a basic clean from the ground with not much more than a garden hose. Here we'll explain how to clean your solar panels safely and effectively. **READ NEXT:** The best solar panels to buy
