How do I choose a solar backup generator?

If you only need your solar backup generator to power a few essential items, confirm the energy consumption of each device. Add up everything you need to power, and you can determine what the output capacity of your generator must be. It's crucial to keep in mind that many appliances require more energy to start up than they need to run.

## What is a small Solar power generator?

A small solar power generator is a relatively cheap, sustainable way to generate off-the-grid power when you need it. For example, if you have a cabin that you can't connect to a power grid and you don't want to rely on a traditional gasoline-powered generator, you might consider installing a small photovoltaic solar power system.

## How to choose a solar generator?

You can compare solar generators by assessing the watts and watt-hours of the systems, as well as their battery chemistries. The pros of solar generators include free renewable energy, low maintenance costs, and clean and quiet operation, whereas the cons include limited power supply, high upfront price, and slow charge time.

## Do you need a solar generator?
