How to deal with the leakage of photovoltaic panels on the roof

Overview

How to Fix Roof Leaks Under Solar Panels

1. Identify the Source of the Leak
2. Disconnect and Remove the Affected Solar Panels
3. Repair the Roof
4. Inspect and Upgrade Mounting System
5. Reinstall and Seal Solar Panels

Can you fix a roof leak under solar panels?

When faced with a roof leak under your solar panels, it's important to take immediate action to prevent further damage to your roof and home. Fixing a roof leak under solar panels requires careful attention to safety precautions and following the proper steps to resolve the issue.

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

How do I know if my solar panels are leaking?

Pooling water on the roof or around the solar panels clearly indicates a roof leak. If you observe standing water after rainfall, it's crucial to investigate further and identify the source of the leak.

4. Decreased Energy Production or System Performance

A roof leak can also impact the performance of your solar panel system.

Do solar panels cover up roof problems?

As solar panels are fitted onto your existing roof structures, they can sometimes cover up roofing issues that would otherwise be obvious. For example, if there is a leak or a moisture-related problem on your roof, the warning signs may be hidden by the solar panel.

How do I seal a leak under my solar panels?

Applying sealant is a temporary solution that can help to seal small gaps or cracks in the roof under your solar panels. This can be particularly useful when you have identified the source of the leak and it is accessible. Here are the steps to follow when applying sealant:

What causes solar panels to leak?

Debris such as leaves and branches can accumulate on your solar panels and cause water to pool. If the water cannot drain properly, it can seep under the panels and cause leaks. Therefore, it is important to keep the area around your panels clean and free of debris.
