How to make solar powered lights

Overview

Here's a video tutorial I made for this project. Check it out below, and consider subscribing to my YouTube channel if you like DIY solar videos like this.

Pick a place to mount the charge controller. Above all, I'd recommend taking into account where you'll mount your solar panel and picking a place for the charge controller where the solar panel's wires can reach. For mine, I.

Note: Most charge controllers — including the one I'm using in this tutorial — require you to connect the battery first, so that's the order of connection I'll.

Once you've connected your battery, confirm that your charge controller turned on. The screen should turn on automatically and start.
