# How to use solar power for renting a house

## Overview

---

Your first port of call should be the owner of the property. Rooftop solar installations are a significant property upgrade, so it's not something you can do without permission. It's also not something you should offer to pay for out of pocket since, in general, you can't take it with you when you leave. Related: [5 Things](#).

Solar panels can also be installed on the ground. Although you'll still need permission from your landlord and help from them getting permits. That said, these solar installations.

Plug-in solar panels are an interesting option that should be appropriate for most renters. These solar panels have micro-inverters that convert the DC energy of the panel to the AC power used by your home. They feed power into your.

Portable power stations are battery backup inverters designed to go with you wherever you may need them. Many models either include a.

A "solar generator" is a battery backup inverter system connected to solar panels via a solar charge controller. Solar power charges the batteries and may also provide direct power to the inverter, which converts the DC power.
