AMBITIOUS GREEN ENERGY GOALS COLLIDE WITH THE REALITIES ...

On the heels of COP29, Saint Lucia's ambitious climate commitments are again in focus. The island has positioned itself as a regional leader in the fight against climate change, with its 2023-2030 National Energy Policy (NEP) setting an aggressive target of 50% renewable energy by 2030. These bold aspirations come against the backdrop of a ... Continued

This document presents St. Lucia's Energy Report Card (ERC) for 2017, which was prepared using data and information submitted by the Member State as well as supplemental data extracted from online resources (see list of References).

[Solar Power: A New Reality](#)

In my opinion, solar power in Saint Lucia remains in the hands of those who can make a large investment in the long term. For those who at some points cannot even afford the cost of electricity services, investing a large sum into solar panels is not a possibility, even though in the long term it will be consistently cheaper than traditional

[Saint Lucia -- Solar Head of State](#)

Saint Lucia emits just 0.0015% fraction of global carbon emissions, but by leading on renewable energy the island can take a strong moral stance and showcase solutions for larger nations to follow. The 5.4kW grid-tied system on Government will save 100 tons of carbon in its lifetime and save the government roughly US\$150,000.

Saint Lucia Goes Solar

Saint Lucia's new farm is expected to contribute 15m units of electricity a year. While this amounts to just 1.3 per cent of the current output from LUCELEC's Cul De Sac power plant, it will make the system more resilient against a single point of failure. In addition, it is forecast to cut Saint Lucia's fuel bill by around 300,000
