Iceland econo energy solutions

Overview

What is the economy like in Iceland?

Today, Iceland's economy, ranging from the provision of heat and electricity for single-family homes to meeting the needs of energy intensive industries, is largely powered by green energy from hydro and geothermal sources. The only exception is a reliance on fossil fuels for transport.

What percentage of electricity is produced in Iceland?

Today, around 73% of electricity in Iceland is produced by hydroelectricity and around 27% is from geothermal energy. Around 90% of heating for buildings in Iceland is from geothermal energy (in the form of geothermal district heating). Please also see: Geothermal District Heating in Iceland.

Can Iceland's transition from fossil fuels inspire other countries?

The story of Iceland's transition from fossil fuels may serve as an inspiration to other countries seeking to increase their share of renewable energy. Was Iceland's transition a special case that is difficult to replicate, or can it be applied as a model for the rest of the world?

Iceland's energy reality.

Can geothermal house heating work in Iceland?

Geothermal house heating has worked wonders in Iceland and has the potential to heat homes across the world. Click on the picture above to watch our video. Iceland has been harvesting renewable energy for more than a century. 100% of electricity and house-heating needs are met with renewables in Iceland.

What are the uses of geothermal energy in Iceland?

It is widely used to melt snow off sidewalks, heat swimming pools, power fish farming, greenhouse cultivation and food processing, as well as for the

production of cosmetics, such as merchandise from Iceland's famous geothermal spa, the Blue Lagoon. Iceland's transition from coal and oil to renewables.

Does Iceland have a geothermal industry?

The Icelandic energy industry has participated in geothermal projects in over 50 countries and continues to be highly active worldwide. An example of such involvement is the construction of the world's largest geothermal district heating system in China, which serves over 1 million customers.
