les battery New Zealand

Overview

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā on North Island. Paris, January 10, 2023 – Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

How much does a battery cost in New Zealand?

The mean charging spot price was \$123/MWh and the median was \$132/MWh. As New Zealand electrifies, more grid-scale batteries will support the growing renewable energy supply. Meridian Energy is building a 100MW (200MWh) battery near Ruakākā in sunny Northland. This battery is expected to be commissioned in September 2024.

Can large-scale battery storage help balance New Zealand's grid?

Transmission system operator Transpower also published studies in 2017 that showed the potential value of large-scale battery storage for balancing New Zealand's grid and in 2019 that showed the potential value of distributed storage.

Can grid-scale batteries be used in New Zealand?

Grid-scale batteries are already able to participate fully in New Zealand's energy market as generation or as dispatchable demand, and can also offer interruptible load while charging. It is however prohibited from providing generation reserve.

New

The reason we specifically went with IES was to move to a modular battery system that allows us more flexibility not just in design, but support as well. We received on site commissioning from IES, whereas with previous manufacturers the commissioning was carried out by RenEnergy personnel. It was great help having IES commission the batteries
