# Illegal construction of photovoltaic panels on rural roofs

## Overview

---

Does community management influence household adoption of rooftop solar photovoltaics in rural China?

This paper examines inequality in household adoption of rooftop solar photovoltaics in rural China through a qualitative study of three villages. The Chinese government promotes distributed solar to drive low-carbon development. However, community management and China's institutional system influence unequal access.

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Can solar panels be installed on rooftops and car parks?

CPRE's report analysed the solar capacity of rooftops and covered car parks across England, providing an assessment of the total energy that could be generated. The key findings are: Installing solar panels on existing rooftops and other land such as car parks could provide at least 40-50GW in England by 2035.

Should solar panels be on a south-facing roof?

'Roof first': local communities can audit solar potential on available south-facing roofs, following the example of Kendal Town Council in the Lake District, and then will be able to prioritise solar panels on suitable brownfield land and avoid best and most versatile agricultural land.

Will homeowners be able to install rooftop solar panels more easily?

Homeowners will be able to install rooftop solar panels more easily without costly planning delays. This was published under the 2022 to 2024 Sunak

Conservative government Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today.

Do local authorities play a role in household rooftop photovoltaic adoption?

The research revealed salient geographic disparities in household rooftop photovoltaic adoption, closely associated with the role of local authorities (particularly village committees) in new energy promotion schemes.
