Case studies in funding innovation: Keeping cool

Later, when Promethean Power Systems moved to India, it leveraged the in-country expertise of Villgro to build better prototypes, hire the right team, and share the new product with potential customers. Funders generally agree that this kind of support is essential. But few philanthropic organizations have the capability in-house to offer these

Promethean Power Systems revolutionizes dairy farming in India with sustainable refrigeration solutions, reducing food waste and empowering farmers. and increases community ownership. In India, where women own only 20-30% of all household wealth, community-owned assets can create a deep impact in these women's lives. Share Share on Facebook

Saving rural India's "liquid cash"

Now MIT startup Promethean Power is bringing India milk-chillers that quickly drop the temperature of milk to reduce bacterial growth, even without electricity. Promethean systems are set up by dairies in collection stations, where farmers can bring milk within half an hour after milking a cow. "This also dramatically improves
