What is the fastest growing microgrid market?

Historically, the commercial and industrial (C&I) segment has lagged behind other microgrid market segments. When Guidehouse Insights launched its Microgrid Deployment Tracker 10 years ago, it was the smallest of all application segments tracked by identified cumulative capacity. It has emerged as the fastest growing microgrid market worldwide.

What are the benefits of microgrids?

Grid quality transformation with Microgrids Benefits Energy efficiency levelling peaks in energy demand, while reducing total cost for energy thanks to on-site generation. Unlock new revenues streams through grid ancillary services Power reliability Environmental sustainability Network security.

Why is the C&I microgrid market so slow?

The C&I microgrid market as defined by Guidehouse Insights has been slow to develop due primarily to the lack of a clear value proposition based on the ROI for microgrids.
