# Install solar photovoltaic panels for street lights

## Overview

---

### How to install a solar street light?

Solar street light installation requires strength, so it's safer to do it while you are on the ground. If you are unsure how to connect the battery to the panels, look for pre-assembled options. The mounting point is usually on the pole's top, so you should use the ladder to reach it.

### How do I choose the right solar street lighting?

Choosing the right solar street lighting can dramatically reduce installation costs but requires careful consideration. Here's what to look for: Solar Panel: Check panel power (Watts), size (M<sup>2</sup>), and efficiency (%). Higher values generally mean better performance. Solar Irradiance: Know the solar power available in your location.

### How do solar street lights work?

Our Sun-Lite solar street lights use LED lighting technology with solar panels that absorb enough energy, no matter the season. Each solar panel is made up of multiple photovoltaic cells. The energy generation process starts with these cells converting solar energy from natural sunlight into electrical energy.

### How do you charge a solar Streetlight?

Some solar streetlight models require an initial battery charge before the light will operate. Refer to the manufacturer's instructions for charging procedures. It may involve connecting the battery to an external charger. Locate the light switch and turn it on. Observe the light operation for a few minutes.

### What is solar street lighting?

Solar street lighting is an excellent solution for temporary or essential works lighting. Solar lights, using redeployable solutions such as the below concrete blocks, can be installed quickly without the need for a mains connection,

providing immediate illumination. This flexibility is beneficial for essential work or emergency repairs.

Can solar street lights be used on a road?

In addition, solar-powered road lighting is immune to power cuts. The road will remain well-lit even if the primary grid fails. Your solar street lights will store energy internally and light up the road for travellers through every season. We can also install temporary solar lighting for use on more minor roads.
