Install the solar panel monitoring bracket

Overview

How do solar panels attach to a roof?

Installers fix solar panels to a roof by lifting up some roof tiles and attaching mounting brackets to the rafters, before carefully placing the tiles back where they were. They'll then attach rails to these brackets, before locking solar panels into the rails.

How do you install solar panels on a roof?

Rail and Panel Installation The cheapest and most practical way to install solar panels is with a combination of rails and brackets. A secure hook is fastened to the rafters underneath your roof tiles and the rails are attached to these exposed hooks across the length of the solar array.

How are solar panels installed?

We use a safe and strong installation method that uses friction to hold the rail and the edge of the solar panel securely in place. This system has been tested for heavy rain, hail and even hurricanes, so you know it's reliable. The panels are then laid on top of the rails, ready to be connected.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

Can I install solar panels on a slate roof?

Not all roofs, including tiled roofs, are suitable for solar panel installation. To determine if your slate roof is compatible, several factors must be considered. Firstly, assess its structural integrity as solar panels add weight to the roof. If needed, reinforce or repair any weak areas before proceeding with

installation.

How do I install multiple solar panels?

To install multiple solar panels, you'll need to connect them in a series or parallel connection. Connect all the wires to your charge controller, battery and inverter. This may take some time. Follow the setup instructions very carefully here and make sure all wires are connected exactly as instructed.
