Ireland mainstream energy solutions

Overview

How many jobs will Mainstream Renewable Power create in Ireland?

Global renewable energy leader Mainstream Renewable Power has today announced plans to create more than 100 new jobs at its global headquarters in Dublin to support its international growth strategy, along with its offshore energy development plans for its home market in Ireland.

Will mainstream re-enter the Irish renewables market?

The three new projects earmarked for Ireland mark the company's re-entry into the Irish renewables market after selling off the Raragh Wind Farm in Kingscourt, Co Cavan, to Blackrock in 2019. Mainstream said its expansion into the domestic market is being supported by the Government through IDA Ireland.

Where is mainstream developing a wind power plant in Ireland?

Mainstream said in a statement on Tuesday that it is now developing three sites off the east, southeast and west coasts of Ireland, with plans for significant offshore wind energy developments at each location that are designed to support the Government's carbon emissions targets for the electricity sector by 2030.

Why is mainstream re-entering into Ireland?

The expansion of Mainstream, which was founded in Ireland in 2008 and continues to have a strong Irish shareholding, coincides with the company's re-entry into its home market, where it is currently developing three sites off the East, Southeast and West coasts of Ireland.

Who supports mainstream's expansion in Ireland?

Mainstream's expansion in Ireland is supported by the Irish Government through IDA Ireland. Tánaiste Leo Varadkar and Mary Buckley, Executive Director, IDA Ireland, officially launched Mainstream's new global

headquarters at an event in Leopardstown today.

Why is mainstream partnering with local suppliers in Ireland?

Mainstream is already engaging with local suppliers in Ireland and accepting expressions of interest in a determined effort to near shore our supply chain for these potential projects; a unique approach of ours which significantly amplifies the economic benefits of our projects to the regions that we work in.
