Is it good to install photovoltaic panels on the roof of a farmhouse

Overview

The ideal place to put a photovoltaic system is on the rooftop, as it's generally the spot most exposed to the sun and would otherwise be unused space. Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice – you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Should I install solar panels on my roof?

If your roof faces another direction as you can likely still see plenty of benefit from installing a solar array. East and west facing roofs are also suitable for solar panels and will still see a good deal of energy generation throughout the course of the day.

Can solar panels be mounted on a flat roof?

For solar panels on a flat roof, mounting systems are slightly different and can include a triangle 'ballast' box to support the panels. For solar thermal panels (with cells that use the sun's heat to warm water in a house) things are a little different.

Can solar panels provide a home with solar generation?

Alternatively, they can potentially provide a home with solar generation if the main roof is unsuitable for installation. Photovoltaic (PV) solar panels have been on the radar since the Feed in Tariff was introduced in 2010, and are again becoming popular as electricity prices surge.

Where should a photovoltaic system be installed?

The ideal place to put a photovoltaic system is on the rooftop, as it's generally the spot most exposed to the sun and would otherwise be unused space. But

which types of roof are suitable for solar panels?

The first step is to make sure you own your roof.

Can solar panels be installed on a combustible roof?

In general terms, solar panels should not be installed on combustible roofs unless some form of fire protection can be installed between the panels and the roof e.g. concrete panels or pebble ballast. 3. Location of solar panels
