Is it okay to install photovoltaic panels in an old house

Overview

If your roof is old, the answer is no—at least not until you replace it. Should you install solar on an old house?

When deciding whether to install solar on an old house, it's important to seek a professional opinion on the condition of the roof, the age of the switchboard, and any other issues that may impact on the installation of a solar system. This will vary for each property, so it's important that a site inspection is undertaken before installation.

Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.

Why are solar panels not working in older houses?

Older houses often have established trees which have grown over decades. The problem with tall old trees is that they may overhang the solar during parts of the day or in different seasons. If one cell in a solar panel is covered by shade, the whole string of panels won't work and the solar system will have reduced power.

Can solar panels be installed on a roof?

"The solar panels will need to be mounted on the roof by installers who

understand roofing and will need some scaffold decks to safely get the panels to the roof.

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.
