

## Solar Energy South Africa

# Is rooftop solar power legal

## Overview

---

Can rooftop solar panels be installed on homes & businesses?

The government has announced a change in planning rules that will enable rooftop solar panels to be installed on homes and businesses through permitted development rights. This means that homeowners and businesses won't need to go through the full planning process.

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Is rooftop solar a good investment?

Chris Hewett, chief executive of Solar Energy UK and co-chair of the Taskforce, said: Installing rooftop solar power, whether at residential or commercial scale, is one of the best investments available, offering dramatic savings on energy bills and the opportunity to be paid for sending excess power to the grid.

How many solar panels can you install on a rooftop?

Installing solar panels offers many benefits, and it makes financial sense to get as many panels as possible once your scaffolding is set up. Providing the panels don't sit closer than 400mm from the edge of your rooftop, you can install as many panels as you want.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?
