# Italy emergency power supply for house

## Overview

---

How much electricity does Italy provide?

The basic electricity contract in Italy is set up to provide approximately 3 to 3.2 kilowatts. If a household expects to run a number of appliances simultaneously and exceed the power available a larger supply (up to 6 kilowatts) can be requested. There is a larger flat rate payment for the supply plus usage charged.

How many kilowatts is enough for a home in Italy?

For most Italian homes, 3KW is sufficient, however if you feel that 3KW is not sufficient you may request an upgrade of the power from your electricity supplier (If a household expects to run a number of appliances simultaneously and exceed the power available a larger supply (up to 6 kilowatts) can be requested).

Can I buy a power adapter in Italy?

Adapters can be bought for appliances with foreign plugs. The basic electricity contract in Italy is set up to provide approximately 3 to 3.2 kilowatts. If a household expects to run a number of appliances simultaneously and exceed the power available a larger supply (up to 6 kilowatts) can be requested.

Where can I get electricity in Italy?

ENEL is the Italian national power company but there are some others you can choose among. In order to set up a contract for the supply of electricity in Italy you need to contact the provider and will require proof of identity, your tax number, bank details and details of your property.

Which electricity provider should I Choose in Italy?

There are several electricity providers in Italy and you are free to choose which provider you would prefer. ENEL is the Italian national power company but there are some others you can choose among.

Does Italy have a power outlet?

In the US, electricity comes out of the wall socket at 110 volts, alternating at 60 cycles per second. So, the voltages and frequencies are different and so too are Italy's outlet types. The photo above shows a normal Italian power outlet.
