.

When did IDM start?

One of the milestones in iDM developments was the introduction of fresh water technology for hygienic water heating in 1987. Since the end of the 1990s, the focus has been on the development and production of economical and environmentally friendly heat pump systems, hot water preparation and also for cooling buildings.

What makes IDM a leader in Intelligent Energy Management?

Our long-established family business is one of the technology leaders for intelligent energy management in our company, primarily due to its development expertise and numerous technical innovations. One of the milestones in iDM developments was the introduction of fresh water technology for hygienic water heating in 1987.
