SOLAR SOLUTIONS

Microgrid solutions are becoming more feasible within South Africa as clusters of consumers aim to "Get off the Grid". Microgrids are also feasible options for remote sites with little to no grid access. To apply for a job with IJKA, please send a cover letter together with your C.V. to: info@ijika . Solar Electrical / Solar UPS systems - Solar Solutions

How does the panel convert sunlight into electricity? Solar-powered photovoltaic (PV) panels work by absorbing sunlight with photovoltaic cells, generating direct current (DC) energy and then converting it to usable alternating current (AC) energy with the help of inverter technology.

About us

We are committed to driving the transition to clean, renewable energy sources in South Africa and beyond, making a significant impact on the environment and the lives of people.
