Justrite lithium battery cabinet Czechia

Nominal Capacity

280Ah

Nominal Energy

50kW/100kWh

IP Grade

IP54

Overview

What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard™ system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. [Shop Now.](#)

What is a lithium ion battery charging and storage cabinet?

The new Justrite lithium ion battery charging and storage cabinet provides the ideal storage solution. Featuring ChargeGuard™ technology, this new cabinet was designed especially for minimizing the risks of battery fires and thermal runaway that arise when storing and charging lithium ion batteries in the workplace.

What are Justrite Li-ion battery charging and temporary storage cabinets?

The new Justrite li-ion battery charging and temporary storage cabinets were designed to reduce the risks of battery fires and thermal runaway.

What are the safety guidelines when charging and storing lithium-ion batteries?

To minimize these risks, it is important to follow safety guidelines when charging and storing lithium-ion batteries. This includes using the appropriate charger, avoiding overcharging or undercharging, storing batteries in a cool and dry place away from flammable materials, and disposing of damaged or old batteries properly.

Why should you choose a lithium-ion battery storage benchtop?

The lightweight and compact benchtop design allows for easy relocation, and the lockable doors ensure controlled access to the batteries, preventing theft. Improperly charging and storing lithium-ion batteries can pose several risks, including fire and explosion. The batteries contain a liquid electrolyte that is

highly volatile and flammable.

Lithium Ion Battery Fire Case Study , NoTrax

Justrite's lithium-ion safety cabinet is your insurance policy against catastrophe. Lithium-ion battery explosions are incredibly dangerous and damaging, and without an effective containment solution, the fire will continue to burn uncontrolled. These fires can't typically be put out with water, so containment is your best option.
