

## Solar Energy South Africa

# Krannich solar energy Western Sahara

## Overview

---

Who is Krannich Solar?

Krannich Solar Kft. Ul. Krzemowa 1 Budynek nr 3 Krannich Solar Unipessoal LDA. Ticaret Limited Sirketi Zeytinlik Mah. Türkçü Sk. Ferah Palas A Blok No. 16/10 The beginning as a two-man business, today an internationally successful company. Get to know our Krannich subsidiaries.

Could the Sahara be transformed into a solar farm?

In fact, around the world are all located in deserts or dry regions. It might be possible to transform the world's largest desert, the Sahara, into a giant solar farm, capable of meeting the world's current energy demand. Blueprints have been drawn up for projects in and that would supply electricity for millions of households in Europe.

Could large solar farms in the Sahara Desert redistribute solar power?

Large solar farms in the Sahara Desert could redistribute solar power generation potential locally as well as globally through disturbance of large-scale atmospheric teleconnections, according to simulations with an Earth system model.

Can large-scale solar farms influence atmospheric circulation in the Sahara Desert?

Our Earth system model simulations show that the envisioned large-scale solar farms in the Sahara Desert, if covering 20% or more of the area, can significantly influence atmospheric circulation and further induce cloud fraction and RSDS changes (summarized in Fig. 7) across other regions and seasons.

Could a greener Sahara have a bigger global effect?

Some important processes are still missing from our model, such as dust blown from large deserts. Saharan dust, carried on the wind, is a vital for the

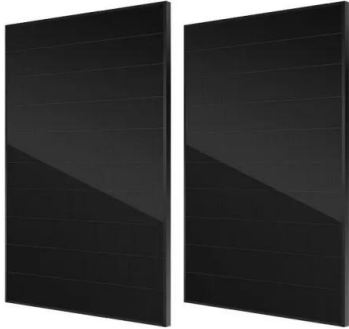

Amazon and the Atlantic Ocean. So a greener Sahara could have an even bigger global effect than our simulations suggested.

Did the Green Sahara increase land monsoon precipitation during middle Holocene?

Sun, W. et al. Northern Hemisphere land monsoon precipitation increased by the Green Sahara during middle Holocene. *Geophys. Res. Lett.* 46, 9870–9879 (2019).

## Krannich Solar: Growth Despite Market Conditions

Navigating Shifts: The Solar Market Landscape in 2023. Krannich Solar remains on course for growth in 2024 - despite a PV market that has changed in 2023. "After many PV markets around the world ran hot for two years, they cooled down noticeably, especially in Europe and the USA," explains Kurt Krannich, founder and CEO of the PV wholesaler.
