Overview

Can solar panels reduce electricity consumption in Cagayan de Oro?

With the Greenergy Solar PH based in Cagayan de Oro City, many Cagayans now already found a solution to pull their electric consumption down – through the installation of solar panels. However, truth be told that the installation of solar panels may be pricey and everyone is not ready to fund it in cash.

Can Cagayan de Oro generate solar power year-round?

In conclusion, Cagayan de Oro offers suitable conditions for generating solar power year-round with proper panel installation and maintenance measures in place to address local environmental factors like rainfall and humidity that could potentially impede energy production efficiency.

How should solar panels be positioned in Cagayan de Oro?

In Autumn, tilt panels to 14° facing South for maximum generation. During Winter, adjust your solar panels to a 24° angle towards the South for optimal energy production. Lastly, in Spring, position your panels at a 2° angle facing South to capture the most solar energy in Cagayan De Oro, Philippines.
