Overview

ACWA Power is a developer, investor, co-owner and operator of a portfolio of power generation and desalinated water production plants with a presence in 13 countries across the Middle East, Africa, and central and southeast Asia. ACWA Power's portfolio of projects in operation and development has an investment value of USD 85.7 billion, and a capacity of 55.1 GW of power and 8 million m.

Can Laos become a regional energy hub?

It has facilitated a 100 megawatts of cross-border power trade from Laos to Singapore via Thailand and Malaysia, with Phase II commencing in September 2024, seeking to double capacity. For Laos, the APG has immense potential to turn it into a regional energy hub, generating new revenue, jobs, and local industry.

Does Laos have a green energy plan?

The Laos government has an investment plan that will aid national development and contribute to a broader green energy revolution in Southeast Asia. High debt levels and the promise of ecological destruction along the Mekong has raised concerns, and may prove prohibitive without careful engagement and regional backing.

Why does Laos lag in infrastructure development?

Laos lags in infrastructure development and lacks the capacity to fund many of its projects. According to the Lowy Institute, more than half of Laos' official development finance is geared towards energy projects, especially hydropower projects, which is more than double the regional share.
