Overview

How many solar power plants are in Laos?

VIENTIANE, Feb. 1 (Xinhua) -- A total of 58 solar power plants have been completed or under construction across Laos with a total installed capacity of 7,656 MW, local daily Vientiane Times reported on Tuesday. Eight of these plants have been completed and 50 are under construction, said the report.

How much power will Laos have?

Of this amount, 77.59 percent will come from hydropower and the rest will come from solar, wind and coal-fired power plants, said the report. Laos' capacity for solar power is expected to range from 10,000 MW to 15,000 MW, while wind power potential is estimated at about 100,000 MW, according to the report. ■.

Will Laos be the first utility-scale solar PV facility?

Once operational, this will be the first utility-scale solar PV facility in Laos. The SAPP is a key project to ensure energy security and reliability in the country while also increasing renewable energy (RE) capacity.

Who owns EDL-Gen Lao solar PV Park?

EDL-Generation Public and Pattana Energy Absolute are currently owning the project having ownership stake of 60% and 40% respectively. EDL-GEN Lao Solar PV Park is a ground-mounted solar project. Post completion of the construction, the project is expected to get commissioned in February 2017.

Why is solar energy important in Laos?

Laos is undergoing rapid socio-economic changes and the provision of sufficient energy is an important factor in the response to continuing development. "Given recent advances in solar energy in Laos, it has become clear that more and more local and foreign businesses are interested in investing in this field," Daovong said.

How much electricity will Laos produce by 2030?

These developments will support government efforts to increase the amount of energy exported and minimize the amount of electricity re-imported from neighboring countries in the dry season. By 2030, it is planned that Laos will produce another 5,559 MW of electricity.
