I just need a 5v solar charger module so that I can connect my 18650 lithium battery, solar panel and arduino to it. [Screenshot_1] This is the link to the module description if it helps: CN3065 Mini Solar Charger Module. found via a google search for "fritzing part solar cell charger" as I remember making it but not what it was called.

Solar panels are the best and easiest way to reduce electricity bills by up to 50%, produce 100% green energy and increase the value of real estate. In Latvia, solar energy systems have been installed in more than 800 households, as well as several industrial solar parks.

Why not drive a motor directly off the solar panel? I don't know if it'll work, but I can't see why not - so I'll be giving it a try. (currently the voltage from the solar panel is not enough to drive the MOSFET I'm using reliably - I'll try alternatives and adjustments) How fast do you want them spinning? Probably not that fast. I'm talking a

Which appears to be the original charger. You need to use google to search for Fritzing parts. Typically a search for "fritzing part BQ24074" which has this web page as the first hit, will find the part. In Adafruit's case reading their excellent web pages looking in technical details for references to Fritzing parts is also a good bet. Peter
