

Solar Energy South Africa

Leading photovoltaic energy storage fund

Overview

The Global Energy Storage Program (GESP) is the world's largest fund dedicated to supporting renewable energy storage at scale in developing countries. Who is NextEnergy Solar Fund?

NextEnergy Solar Fund is a leading specialist solar energy and energy storage investment company that is listed on the main market of the London Stock Exchange and is a constituent of the FTSE 250. NextEnergy Solar Fund invests primarily in utility scale solar assets, alongside complementary ancillary technologies, like energy storage.

Does NextEnergy Solar Fund have a 50MW energy storage asset?

NextEnergy Solar Fund's maiden standalone 50MW energy storage asset, named Camilla, has successfully begun commercial operations. This is a significant milestone for the Company as it increases NESF's total installed net capacity above 1GW to 1,014MW.

What is NextEnergy Solar Fund Limited (Nesf)?

NextEnergy Solar Fund Limited (NESF) is a specialist solar and energy storage climate impact fund, which is listed on the premium segment of the London Stock Exchange. It currently has an installed capacity of over 1GW spread among 103 individual operating assets in the UK and Italy, comprising an unaudited gross asset value of £1,173m.

Is NextEnergy Solar Fund energising 260mw in Europe?

NextEnergy Solar Fund is pleased to announce the energisation of its first two international solar co-investments alongside NextPower III ESG ("NPIII ESG"), bringing an additional 260MW online in Europe. NextEnergy Solar Fund's maiden standalone 50MW energy storage asset, named Camilla, has successfully begun commercial operations.

Where does NextEnergy invest in solar PV assets?

The Company invests in solar PV assets primarily in the United Kingdom. It seeks to acquire sole ownership of individual solar PV assets through special purpose vehicles (SPVs). Its investment adviser is NextEnergy Capital Limited.

Why should you invest in OECD-based solar energy infrastructure assets?

It seeks to provide ordinary shareholders with attractive risk-adjusted returns, principally in the form of regular dividends, by investing in a diversified portfolio of primarily the United Kingdom and Organization for Economic Co-operation and Development (OECD)-based solar energy infrastructure assets.
