Spiking Neural Networks in Vertical Federated Learning: ...

tensively studied using traditional Artificial Neural Networks (ANNs) [3], there has been limited exploration into its integration with neuromorphic and potentially more efficient models, such as Spiking Neural Networks (SNNs). Neuromorphic or neuro-inspired learning techniques are increasingly recognized as a powerful and energy-efficient

Orange Liberia, ZTE boost rural connectivity with new 2G/4G sites

The sites - which ZTE is branding as "RuralPilot EcoSites" - integrate solar energy and smart lithium batteries, enhanced with ZTE's PowerPilot AI energy-saving software for better energy efficiency. The sites also support flexible backhaul connectivity options, including microwave, satellite, and 4G relay technology.

Liberia Petroleum Refining Company, Stratcon Energy and ...

MONROVIA, LIBERIA-The Liberia Petroleum Refining Company (LPRC) and Stratcon Energy and Trading Company of Ghana have signed an agreement for the supply of petroleum products on the Liberian market. LPRC Managing Director Amos Tweh said:" Under the partnership, LPRC will import petroleum products to increase the Country's strategic reserves

Liberia: Deputy Mines and Energy Minister Reaffirms Gov't's ...

The cross-border interconnection project (CLSG), designed to enhance electricity access across the four Mano River Union countries--Côte d'Ivoire, Liberia, Sierra Leone, and Guinea--was underscored during a recent visit by Deputy Energy Minister Charles Umehai to the Buchanan substation. By Edwin G. Genoway,Jr(231458910)

Nokia and iSAT Africa to enhance rural coverage in Liberia

By extending network coverage beyond major cities, this partnership aims to drive socio-economic development in Liberia's remote areas. The 200-site deployment will expand iSAT Africa's network reach, offering mobile network operators a solution that is both cost-effective and highly efficient.

Self-Evolving Integrated Vertical Heterogeneous Networks

proaches suitable for current and future integrated vertical networks. We investigate vertical integration and coordination between three tiers with AI/ML-based network management. The main contributions of this paper are as follows:

- o We conceptualize an architecture of SEI-VHetNets and identify open challenges to realize this architecture.

Powering Liberia's Future: Captan's Legacy and the Energy Sector's

Monie Captan's exit from the Liberia Electricity Corporation (LEC) on November 30, 2024, marks the conclusion of a significant chapter in Liberia's energy sector and the beginning of a critical ...

Powering Liberia's Future: Captan's Legacy and the Energy ...

Despite these significant strides, Liberia's energy sector still faces considerable challenges. As of 2024, only a fraction of Liberians, predominantly in urban areas, enjoy consistent electricity access. The World Bank reports that Liberia aims to increase electricity access to 70 percent by 2030 from the current rate of 28 percent[6].
