China to Launch Green Certificates in Renewable Energy Sector

Seeking other sources, including non-hydro renewable energy quotas, to complement the green certificates in resolving the subsidy gap. China plans to combine the green certificate with the mandatory non-hydro renewable energy quota system in 2018 as an incentive to engage suppliers and buyers.

Renewable energy powers ahead in 2020: report , Macau Business

Renewable energy accounted for 90 percent of new electricity generation installed last year. "Shifting power generation to renewable sources is a key pillar of global efforts to reach carbon neutrality," said the agency which advises developed nations on energy policies.

Renewable energy boosts China's green development in past ...

As the world's largest market and largest equipment manufacturer for renewable energy, China has also actively promoted global green and low-carbon energy transformation and conducted extensive cooperation in renewable energy to tackle global climate change, working with other countries in a number of projects over the past decade.

The tricky path to tripling renewable energy capacity

G20 leaders pledged to triple global renewable energy capacity by 2030, in a bid to accelerate the clean energy transition and fight climate change. That pledge by the group of wealthy nations -- responsible for around 80 percent of greenhouse gas emissions -- is in line with what experts say is possible and necessary to keep the world's

China's installed capacity of renewable energy sees steady growth

China's cumulative installed capacity of renewable energy has reached 1.32 billion kilowatts as of the first half of this year, exceeding that of coal power for the first time, according to the National Energy Administration. Over the past decade, China has continuously improved its energy consumption structure and increased energy efficiency.

Solar N Plus Secures Single 500MW Overseas Supply Order

CHUZHOU, China, Dec. 12, 2024 /PRNewswire/ -- Solar N Plus New Energy Technology Co., Ltd. (Solar N Plus), a leading solar cell and module manufacturer, has signed a landmark agreement to supply 500MW of high-efficiency N-type solar products to the overseas market. This milestone deal significantly boosts Solar N Plus's global expansion, further strengthening its ...
