

Solar Energy South Africa

Madagascar solargis.com

Overview

What is Solargis data?

Solargis data is available for past, present, and future periods and is updated in real time. We can meet your energy assessment needs from project conception to routine daily management. Our team has more than 20 years of experience in solar resource assessment and PV energy modeling.

Is Solargis a reliable solar database?

Multiple independent studies have confirmed Solargis to be the most reliable solar database. Quality of our data can be transparently verified at any location. Our methodologies are peer-reviewed and published. Solargis data and services are available for 99% of the world's population and cover a 30-year history.

What can Solargis do for You?

Discover Solargis' solutions for all stages of the solar power plant lifecycle. From site selection and yield simulation to designing, monitoring, and forecasting, our software and data ensure you get the right insights. Scan and compare tens or even hundreds of potential sites. Get an in-depth analysis of those with the highest solar potential.

What is high-resolution Solargis data?

High-resolution data (250 m spatial resolution and 1-min or 15-min temporal resolution) better represents typical and extreme weather and improve the accuracy of solar energy simulations. Solargis data has been validated at more than 1500 public and commercial locations globally, and the model validation is systematically expanding.

Does Madagascar have a country Factsheet?

Specifically for Madagascar, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics,

Estudio del potencial regional de energía solar , Solargis

Para identificar las regiones con mayor potencial solar, utilizamos datos de radiación solar modelados por Solargis, así como mediciones terrestres disponibles localmente. Analizamos la variabilidad a corto plazo y estacional de la producción de energía solar para ayudarle a comprender cómo se ajusta a la demanda.

This innovative Solargis Monthly Report enables portfolio managers and PV site operators to optimize operations and deliver clear insights to board members, senior management teams and C-suite decision makers about the performance of their PV projects.

Technology

At Solargis, we provide extensive and accurate weather information, with a specific focus on those developing or operating PV power plants. The site's solar and weather conditions have a direct impact on the performance throughout the entire lifecycle of a PV project--from site selection to design, financing, and power plant operations and maintenance.

About us

GeoModel Solar rebranded to Solargis. 2017: Launch of the Global Solar Atlas developed by Solargis as part of the World Bank Group's ESMAP initiative. 2018: Solargis API is released. 2019: The Solargis Prospect app is launched, making the pre-feasibility phase easier and more reliable. The app also features a set of high-resolution maps that

Effective solar resource analysis software , Solargis

After a quality assessment is performed, the users of Solargis Analyst can generate a PDF report and XLSX tables with the results of the quality assessment. The report provides a summary of quality assessment results, and comparison statistics including the most representative graphs and tables, together with information about the measuring

Customized GIS Data

Take Solargis GIS and array-oriented data and perform your own spatial analysis, develop your own algorithms, or simply add the data to your spatio-temporal data pool. You can use Solargis solar resource, PV, or climate raster data in GeoTIFF (for aggregated data) and NetCDF (for time series data) formats.

Technology

Solargis' technology is based on scientific research applied and validated by the solar industry. Our expertise meets at the crossroads of three main fields: meteorology, engineering, and data science. Explore. Methodology. See how we transform scientific knowledge and results of our research into our technology.

Services

The Site Adaptation of Solargis Models service will give you locally enhanced solar and meteo parameters, enabling you to reduce uncertainty of power plant design and energy yield simulations. Explore. Quality Control of Solar & Meteo Measurements.
