Malawi wts energy europe

Overview

How much energy does Malawi use?

Fossil Fuel Energy Consumption (% of total): Given its relatively small land-mass, large (and growing) population and heavy dependence on fuel wood, Malawi is an increasingly energy-stressed country. The National Energy Policy estimates that 93% of total energy demand is met by biomass energy. Households consume 84% of the total primary energy.

Does the EU support Malawi's long-term development plan?

EU Ambassador to Malawi, Rune Skinnebach, said the EU supports Malawi's long-term development plan, Malawi 2063, and achieving its goal of reaching an industrialized, upper middle-income status by 2063 depends much on the development of a modern energy sector.

Why is Mera twinning a good time for Malawi 2063?

"This Twinning Programme could not have come at a better time than now when MERA is realigning itself to the Malawi 2063 aspirations for modernization and industrialization of the economy with the energy sector playing a central role," added Matola.
