

Solar Energy South Africa

Mexico energy storage north america 2024

Overview

How much solar power does Mexico need in 2024?

To meet the 35% clean energy target in 2024, Mexico needs at least 128.83 TWh or 42.56 TWh of additional clean energy generation. National solar PV capacity potential is estimated at 24,918 GW.¹ This potential capacity could generate 50,196 TWh/yr or 137 times the 365 TWh estimated demand for Mexico in 2024.

How much wind power will Mexico generate in 2024?

National wind capacity potential is estimated at 3,669 GW¹. This potential capacity could generate 5,759 TWh/yr or 15 times the 365TWh estimated demand for Mexico in 2024. NREL Renewable Energy Data Explorer.

Can solar be used as a wind energy source in Mexico?

Solar deployment can follow wind transmission. Targeted grid upgrades, if any, for wind, will benefit solar as well because solar resources exist in all areas of the country. Solar potential in Mexico is six times larger than wind, and the technology complements wind generation very well.

Is Mexico a good place to invest in green hydrogen?

Mexico has some of the best potential green hydrogen resources in Latin America. Develop a national hydrogen road map to provide direction for industry and investors. Aggressively develop renewable electricity resources so that Mexico is positioned for development of large-scale green hydrogen production.
