What is Schneider Electric Indonesia?

Schneider Electric Indonesia. Implement and operate your microgrid to produce and consume local energy. Monetize the value of your DER, optimize your bill, and avoid interruptions.

Is a microgrid free?

The exciting answer for organisations is “it’s free” because an energy-as-a-service (EaaS) approach eliminates your upfront costs. A microgrid, in a more traditional way, is a CapEx and an OpEx model. In a project mode, it’s high CapEx and low or no OpEx, in an energy-as-a-service business model, it’s high OpEx.

Is a microgrid a capex or a OPEX?

A microgrid, in a more traditional way, is a CapEx and an OpEx model. In a project mode, it’s high CapEx and low or no OpEx, in an energy-as-a-service business model, it’s high OpEx. EaaS is a financing model for microgrids that allows you to avoid upfront costs.
