The Evolution of HPC Storage: More Choices Yields More Decisions

[SPONSORED CONTENT] The past few years have brought many changes into the HPC storage world, both with technology like non-volatile memory express (NVMe) or persistent memory, and the growth of software defined storage solutions. Gone are the days when IBM Spectrum Scale (secretly, we know we all still call it GPFS) or Lustre were the only real ...

Warehousing Solutions & Storage Services in Mozambique , OSS Mozambique

OSS Mozambique provides warehousing solutions in Mozambique. If you're interested in storage units, customized warehouse services and testing laboratories, then our warehouses are exactly what you need. Our warehousing network ensures cost effective storage solutions for our clients in Tete, Pemba, Nacala and Maputo.

Storage Options for HPC workloads on Cloud

HPC Storage Architecture. File System. The file system serves as the central resource in FSx for ONTAP, similar to an on-premises NetApp ONTAP

cluster. The storage solutions also are easy to migrate to and the data migration can be done using standard tools. All the important goals like performance, scalability, durability, security

Parallel file systems. When your computational needs exceed your storage performance, it's time to consider deploying a parallel file system. With features like discrete metadata storage, multiple parallel read and write servers, native file system clients, and accelerated MPI-IO, a parallel file system provides the performance you need for HPC, big data, and AI/ML workloads.

But there is more: huge amounts of data are created around the clock - they need to be written and read continuously. This is why the faster storage system underneath, the quicker

the HPC system gets in total. Parallel filesystems in combination with enabling technologies are the best choice for HPC, AI and Machine Learning workflows.

There are a number of solutions competing with DMF at the moment. I'd take a look at what's on the market and what admin overhead they have. When it comes to primarily storage I think you need to take a hard look at your data use patterns. For instance, lustre tends to choke when hit with many small data requests.
