Application scenarios of energy storage battery products

Tesla breaks ground on Texas lithium refinery

Tesla on Monday broke ground on a lithium refinery in Texas, US, that will produce enough of the metal to power approximately one million electric vehicles (EVs) by 2025.. If the estimated figures are correct, the refinery will be the largest of its kind in North America. The facility will expand car manufacturer Tesla's supply chain reach, moving it into the complicated ...

Virgin Islands Energy Office Overhauls Battery Program

Effective Nov. 8, the Virgin Islands Energy Office overhauled the Virgin Islands Energy Storage (VIBES) program, opening up the application specifications to allow for larger battery systems to participate. VIBES is all about keeping the lights on, even when a storm or other event causes electrical service in the territory to be disrupted.

Timeline: Tesla's moves to clean up battery metals

June 2018 - Musk wants cobalt out of Tesla batteries. In response to concerns over the ethicality of cobalt mining, particularly in the Democratic Republic of the Congo (DRC), Musk tweeted in 2018: "We use less than 3% cobalt in our batteries & will use none in next-gen", signalling Tesla's desire to move away from a reliance on cobalt in future batteries.

Uncontacted Tribe May Be Wiped Out By Mining For Electric Car Batteries

Survival says that Tesla, the world's largest

electric vehicle company owned by Elon Musk, has signed billion-dollar contracts to buy Indonesian nickel and cobalt for their batteries. Advertisement

U.S. Virgin Islands issued subpoena to Elon Musk in Jeffrey

1 looks like the USG has evidence of large transactions between Musk and Epstein - aka money laundering. 5 looks like USG has evidence that Musk, at the very least, helped Epstein with his sex trafficking. USG would not ask for this info if they didn't have evidence and know that Musk is holding more of the evidence.
