

Solar Energy South Africa

Myanmar micro energia

Overview

Does Myanmar have solar power?

Myanmar has plentiful renewable energy resources, not only solar radiation but also hydropower. The country's maximum solar power potential was an estimated 40 TWh/year, and the capacity potential of micro- and mini-hydropower about 230 MW and of large hydropower about 100,000 MW (ADB, 2016).

Are microgrids a cheapest power source in Myanmar?

Discussion The LCOE values of microgrids powered by solar PVs and batteries in Myanmar are still high, but lower than those of diesel power sources depending on fuel price – and these systems are expected to be one of the cheapest power sources in the near future in combination with LIBs.

Can microgrids be used in rural electrification in Myanmar?

In Myanmar, SHSs were deployed in off-grid areas by the government (Greacen, 2015; Sovacool, 2013). In the current study, we focused on microgrids, which have a distributed power source and supply electricity to households. In the context of rural electrification in Myanmar, we use microgrids to mean only the isolated system from the main grid.

How much does a solar PV system cost in Myanmar?

For the specification, we assumed that the highest class of lead-acid batteries are installed in Myanmar. Our assumption of the current installation costs for solar PV systems was 2,178 US\$/kW, which is based on the averaged results of interviews. It is similar to the price in ASEAN Member States, i.e. 2,576 US\$/kW (ACE, 2016).

How much does diesel fuel cost in Myanmar?

According to an interview with a local developer, the price of diesel fuel on a remote island in Myanmar was about 2,000 MK/L (about 1.46 US\$/L) compared

with 750 MK/L (about 0.55 US\$/L) in Yangon in 2017.

Will Myanmar increase the main-grid tariff?

The government plans to increase the main-grid tariff, but Frontier Myanmar Research (2017) reported a delay in these plans in November 2017. The tariff gap expands the inequality between grid-connected urban and microgrid rural areas (Dapice, 2014).
