What are EPC services?

These companies chose their primary service as “EPC” when applying to the list, and they may also work as developers, installers, electrical subcontractors, installation subcontractors and sales partners. The listed kilowatts installed by each company could be performed within multiple services and not just EPC work.

Who owns Top Energy?

Top Energy was first established in 1935 and is a company owned by its power consumers. The company’s shares are held by the Top Energy Consumer Trust on behalf of electricity consumers in the region. Top Energy is a local electricity network provider and geothermal generator. It supplies over 31,500 electricity consumers in the Far north.

What percentage of New Zealand's electricity is generated from renewable sources?

In this number, hydropower covers 70 percent while geothermal power covers the remaining 10 percent of electricity generation. Image from Energy Mix However, to take the electricity generation from renewable sources to 100 percent, the Government of New Zealand plans to add electricity generation from biomass resources.

What percentage of New Zealand's electricity comes from hydroelectric power stations?

Looking at the numbers, it’s no surprise that Hydroelectric power stations provide more than half of New Zealand’s electricity. It shares a 61% share though. Wind shares 5%, Solar shares 0.02%, and Geothermal shares 17%.

Does New Zealand need geothermal energy?

However, to take the electricity generation from renewable sources to 100 percent, the Government of New Zealand plans to add electricity generation from biomass resources. Furthermore, the country is rich in geothermal energy resources because it consists of many volcanic areas.
