

Solar Energy South Africa

Norfolk Island softbank energy

Overview

What is the electricity supply on Norfolk Island?

charge for the connection of the supply and consumption of electricity. The current Energy supply on Norfolk Island consists of: 1.4 MW distributed household rooftop PV owned by members of the community. The Islands distribution network includes: 44km of high and 44km of low voltage cabling of which approximately 50% is underground.

Why is Norfolk Island transitioning to green energy?

Norfolk Island is transitioning to green energy to reduce its dependence on diesel-fired generation, which is becoming more expensive and more difficult to source as countries around the world seek to decarbonize their economies. This initiative is comprised of several interrelated elements: Project Background.

What does the \$200,000 subsidy mean for Norfolk Island?

The \$200,000 subsidy is an interim arrangement while Norfolk Island makes the transition to renewable power, supported by the Australian Government's \$5.3 million investment in improvements to Norfolk Island's electricity network including the roll-out of solar infrastructure.

Why is the government supporting the Norfolk Island community?

The Government is supporting the community to transition to a more sustainable and cost-effective power base. The remote location of Norfolk Island, compounded by freight and supply chain shortages on a global scale, means it was appropriate to look at temporary measures to address the significantly increased cost of power for consumers.

Why is Australia providing a temporary subsidy to Norfolk Island Regional Council?

The Australian Government is providing a temporary subsidy to Norfolk Island

Regional Council to relieve the impact of increased diesel fuel prices on electricity production costs and charges for Council and the community.

What is Norfolk Island's diesel-fired generation initiative?

This initiative is comprised of several interrelated elements: Project Background In 2022, the Commonwealth Government provided a \$5.25 million grant to Norfolk Island Regional Council to transition the island away from diesel-fired generation.
