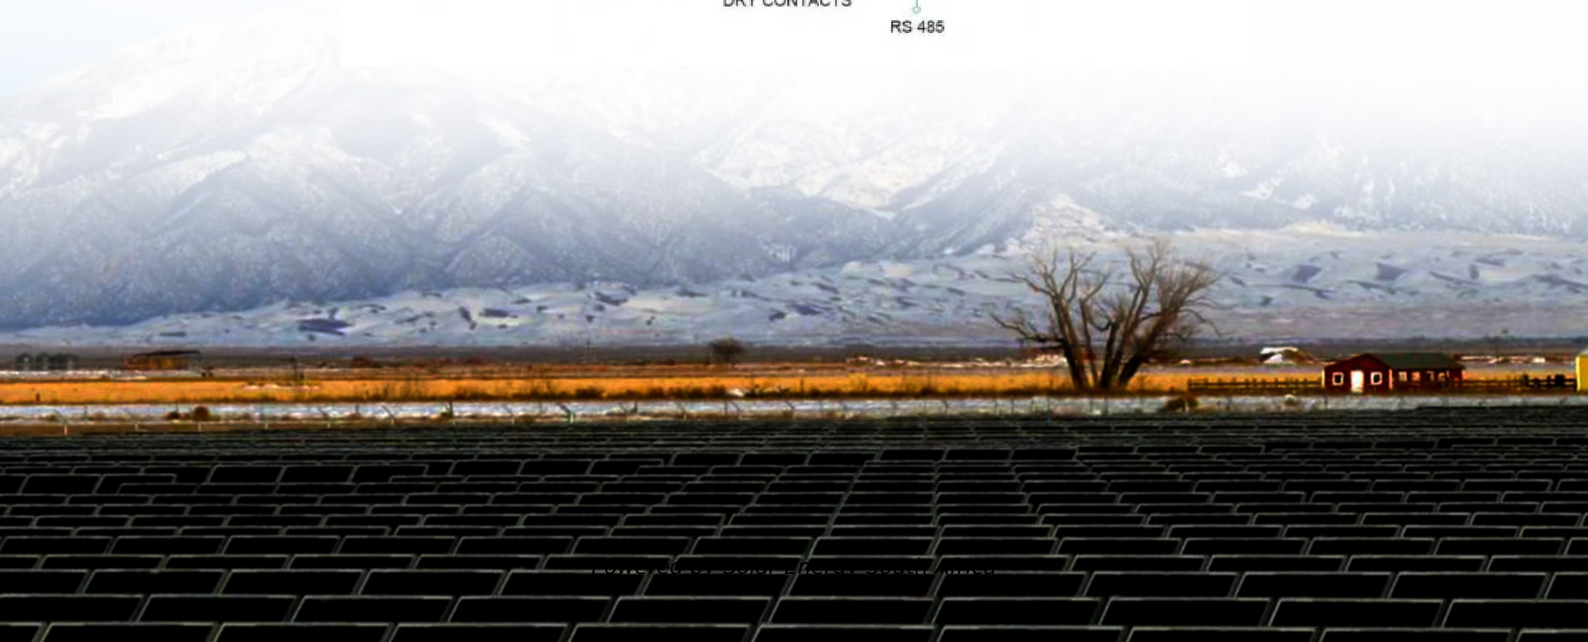
Pakistan greenflash infrastructure



Overview

What challenges are facing Pakistan's green industrialization?

Amid these challenges, sectors key to Pakistan's green industrialization are grappling with significant obstacles in financing, policy formulation and technology access. “It’s critical to strengthen the country’s domestic public and private funding sources and provide the right support,” UNCTAD senior economist Gul Unal says.

Will a UNCTAD study help Pakistan's green industrialization?

A forthcoming UNCTAD study, expected in spring 2024, will offer key recommendations for Pakistan's green industrialization.

Is Pakistan's Textile Industry bad for the environment?

Pakistan's textile industry employs more than 40% of the industrial workforce and accounts for 60% of the nation's exports. But it also has a big environmental footprint. The sector is responsible for over 20% of industrial water pollution, and “fast fashion” production processes are exacerbating greenhouse gas emissions and landfill waste.
