Overview

Can solar energy help alleviate poverty in Palestine?

Several groups and NGOs have already paved the way for the broader use of solar energy in Palestine. Sunshine4Palestine is a great example of how a group can utilize solar energy to help alleviate symptoms of poverty.

Can the environment around the Palestinian territories help solve the energy crisis?

The environment around the Palestinian territories could potentially hold the key to mitigating the existing energy crisis, as well as reduce Palestine's energy dependency on its neighbors and bolstering the economic viability of Palestine as a more self-sufficient nation.

Is Israel a viable solution to Palestine's energy crisis?

Palestine has a significant dependence on Israel and neighboring Jordan and Egypt for the majority of its energy demands. However, this system is not viable as a long-term solution.

How can Qudra help bridge the energy gap in Palestine?

By expanding solar access, Qudra is helping bridge this energy gap, enabling communities to thrive and industries to grow. Operating in Palestine presents unique challenges, particularly in securing financing and dealing with the political complexities that often disrupt the region's economic stability.

What are the challenges facing Palestine's energy supply?

Political instability, population booms, rapid industrialization and increasing demand for higher living standards have put tremendous stress on Palestine's energy supply.

Is solar energy a good idea for Gaza?

With over 300 days of steady sunshine a year, residents of Gaza and the West Bank have increasingly turned towards solar energy as a way to power small, everyday appliances, such as electric fans and other forms of air conditioning. This is especially important during the summer months when temperatures soar.
