

Solar Energy South Africa

Panama solar system

Overview

What is Panama's power system like in 2017?

In 2017, Panama's power system had very large installed hydropower capacity (54% of total capacity) and substantial VRE capacity (45.3%). The generation breakdown was 64% renewable energy (36% run-of-river hydro, 18% reservoir hydro, 8% wind, 2% solar photovoltaics (PV)) and 36% thermal generation (29% oil and 7% coal).

What is the flextool engagement process for Panama?

The FlexTool engagement process for Panama started in October 2017, with a set of discussions during training on power grid studies with large shares of solar and wind.

How much energy does Panama need?

Panama expects total energy demand to more than double between 2017 and 2030 (+113%), with peak demand growing from 1.6 GW to 3.5 GW. Panama is currently connected to Costa Rica via a 300 MW transmission line. A 400 MW high-voltage direct current (HVDC) interconnector with Colombia is expected to be commissioned by 2022.

Does Panama have a flextool?

Panama has taken part in power sector activities under the Clean Energy Corridor Central America (CECCA), for which it is a pilot country. Country experts expect to use the FlexTool in scenarios and studies by ETESA, CND and SNE.

In 2017, while solar and wind capacity reached almost 12%, their generation represented only 6%. Currently Panama has an installed capacity of 270 MW of wind, 194 MW of solar parks, and 35 MW of solar in autoconsumption condition. Penetration of solar energy remains low. Towards the end of 2019 it only represented 2% of total generation matrix.

LEAD BATTERIES: ENERGY STORAGE CASE STUDY

Islas Secas, Panama Harnessing abundant solar resources, an eco-resort located off the coast of Panama has chosen advanced lead batteries, paired with a battery management system (BMS), to power their island microgrid. This unique project has installed new lead batteries to the existing battery energy storage system. Initially using East Penn's
