Black Silicon Carbide

Microgrit SIC-Black. Black Silicon Carbide is a man-made material, made into grain by crushing and grading. It has a strong, blocky shape and the grading is closely controlled in order to achieve high cutting rates and uniform finishes. Typical applications are ...

Microgrid power solution delivered to Peruvian copper

...
Caterpillar dealer Ferreyros has been selected by Ferrenergy, Ferreycorp's energy company in Peru, to provide a microgrid power system for the Agromin La Bonita underground copper mine in Acarà, Peru.

Cat Supplies Equipment for Microgrid at Peru Mine

A Peruvian energy company is using Caterpillar equipment for a microgrid recently installed at a

copper mine. An energy company owned by Ferrycorp, a Peruvian conglomerate, commissioned the project in the second ...

Green Silicon Carbide

Microgrit SIC - Green Silicon Carbide. Green Silicon Carbide is a man-made material, made into grain by crushing and grading. It's strong, blocky shape and accurate grading make it particularly beneficial for lapping and grinding. The green color prevents fillers and other non-abrasive materials to be added and ensuring its purity of 99.5%.

Brown Fused Aluminum Oxide

Microgrit A - Brown Fused Aluminum Oxide. Brown Fused Aluminum Oxide is a tough, long-lasting material. It is brown in color and has slightly more impurities than White Aluminum Oxide. It is a high strength, wear-resistant material possessing a strong ability to resist chemical attacks at extreme temperatures.
