Philippines off grid solar system packages

Overview

Who are the Philippines off-grid solar power system specialists?

Philippines Off-Grid Solar Power System Specialists. Planning, Engineering and Installation services, nationwide! Affordable, Accessible, Clean, Solar Power for your Home or Business. PhilSolar Equipment and Trading Corporation imports and distributes high quality off-grid solar power systems throughout the Philippines.

How to choose an off-grid solar system in the Philippines?

The most important thing to consider though when choosing an off-grid system is the battery chemistry. Most solar installers in the Philippines offer obsolete lead-acid type batteries or poor quality Lithium batteries which are quite hopeless in off-grid applications.

What solar power accessories does philsolar offer?

PhilSolar has you covered! High quality Solar Power accessories such as DC Circuit Breakers, Surge Protectors, Solar Cables, Battery Cables and more. PhilSolar can provide Grid-tied Solar Systems, Off-grid Solar Systems and Hybrid Solar Systems, depending on location, availability of electricity, brownout situation or specific requirements.

What types of solar systems can philsolar provide?

PhilSolar can provide Grid-tied Solar Systems, Off-grid Solar Systems and Hybrid Solar Systems, depending on location, availability of electricity, brownout situation or specific requirements. If we know your electricity consumption during the day, we will be able to design a system that would suit your individual needs best.

How do off-grid solar systems work?

Off-Grid solar systems work in much the same way as hybrid systems do except they are not connected to the grid. They are 100% self-sufficient and

cannot take grid power occasionally when batteries become fully discharged.

Are off-grid solar panels self-sufficient?

They are 100% self-sufficient and cannot take grid power occasionally when batteries become fully discharged. For this reason it is better to oversize off-grid systems so that they are able to generate enough energy even during inclement weather.
