Overview

How does envie use disassembly equipment to dismantle PV panels?

“Envie will utilize our disassembly equipment to dismantle PV panels and then cooperate with Rosi, a French company that developed recycling processes allowing to separate and recover metals such as silver and high purity silicon from the PV cells,” it further explained.

What is a solar module disassembly line?

Developed by Japanese PV equipment provider NPC Incorporated, the solar module disassembly line is claimed to enable the reuse of frames, junction boxes, intact broken glass, solar cells and EVA sheets. The module disassembly line. Image: NPC Incorporated.

How to solder photovoltaic panels?

Ecoprogetti has created an innovation in the field of welding the connections of a photovoltaic panel with the Automatic Bussing machine with induction system to solder the connections of the photovoltaic panels without being limited by the technical characteristics of the photovoltaic cells or by the number of bus bars or wires.

Can solar panels be recycled?

Solar panels should be treated carefully as they may cause electric shock. Awareness of such risk, however, is still very low. We started to develop solar panel recycling technology in 2013, to solve this problem. Recycling glass, weight of which takes around 70 to 80 percent of a panel, is impossible if there are metals.

When did Nedo start promoting PV system recycling?

In 2014 and 2015 consecutively, we joined the development project of PV recycling technology of NEDO with cooperating companies and succeeded in commercialization. The result of our R&D was published in the Guidelines for

Promoting PV System Recycling (2016) by the Ministry of Environment in 2016 as a reference.
