Dragons Breath provide LED Solar Powered Street Lighting using solar lamp post panels and associated matched equipment, which has been designed in the UK.

Are solar street lights energy-efficient?

Solar Powered Street Lights Being energy-efficient isn't just about making changes around the home. At Dragon Breath Solar, we provide a range of products including solar street lights that can be installed across the UK. Our outdoor solar lights are.

What are solar powered street lights?

Easy to install just mechanical fixing no mains powered wires. Dragons Breath Solar powered street lights have been designed to adopt powered illumination using only the sun's energy. These provide us with the ability to design street lights and road lighting are for uses across the UK.

How do solar street lights work?

Our Sun-Lite solar street lights use LED lighting technology with solar panels that absorb enough energy, no matter the season. Each solar panel is made up of multiple photovoltaic cells. The energy generation process starts with these cells converting solar energy from natural sunlight into electrical energy.

Are solar street lights energy independent?

Become energy independent today with Sun-Lite. Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the

perfect choice for outdoor lighting.

Should you invest in solar street lights?

We have the solution: off-the-grid street lighting. By investing in solar street lights with Sun-Lite Solar, you can cut all ties to the National Grid. Instead, you can generate, store and deliver your own renewable energy. What's more, if your solar panels produce excess energy on a particularly sunny day, this will be stored inside the batteries.
