# Photovoltaic panels need to be covered with rain cloth

## Overview

---

Solar panels are designed to withstand the elements, including rain. However, if you live in an area with particularly heavy rains or thunderstorms, it's important to take steps to protect your solar panels from damage. This can include installing a weatherproof cover over your solar panel array or simply removing the.

Most solar panels on the market today are designed to be waterproof. However, a few factors can affect how well your solar panel withstands water.

When it rains, the water washes away any dirt or debris that may have accumulated on the solar panels. This is good because it keeps the panels clean and allows them to function at peak efficiency. However, if there is a heavy.

As more and more homeowners look to solar power to offset energy costs, it's important to know how to protect your investment. Here are a.

A solar panel protective cover is an important investment for any home or business owner with solar panels. Not only do these covers protect your panels from the elements, but they.
