

## Solar Energy South Africa

# Photovoltaic panels on the roof of the whole house

## Overview

---

Whether or not you can power your entire home with solar energy will depend on a few different factors. Here are the 3 most important questions you'll need to answer first: 1. How much electricity do you generally use?

2. How much sunlight does your home get?

3. How much space do you have for solar panels on your.

Everybody's answer to this question will be different. How much electricity you normally use can depend on lots of things - like: 1. How big the.

Contrary to what you might think from looking at our grey skies, here in the UK we do have enough sunlight for solar power! The Met Office has worked out these average figures, to.

So, now you know how much electricity you need, and how much sun you're likely to get. The final question remains: how many panels will you need to power your home, and do you have space for them?

To answer this, we need.
