Photovoltaic roof mounting panels

Overview

What is a solar panel mount?

Solar panel mounts secure solar panels either to your roof or on the ground. Solar panel mounts typically account for 10% of the total solar panel installation cost. IronRidge and Unirac are the best options for roof and ground mount solar systems.

Can solar panels be installed on a flat roof?

Flat roof solar panel mounting systems require a specific approach. To install solar PV on south facing flat roof we would use a ballasted system. This means the roof is not penetrated (which would let in water on a flat roof), and the system is unable to be lifted or tipped over by the wind.

Can a solar panel be mounted on a vehicle roof?

Brackets for mounting solar panels to a vehicle roof, or on a boat deck. The ABS solar panel mounting brackets can be used with any aluminium framed solar panel to provide a secure fixing for vehicles, caravans or boats without drilling any holes through the roof.

What are solar panel mounting solutions?

Solar panel mounting solutions allows you to install solar in different locations and surfaces. Learn about ground and roof solar mounting.

Can solar panels be installed with solar panel mounts?

Enter your zip code below to find out the potential savings for installing solar panels with solar panel mounts on your home. Solar panel mounts secure solar panels either to your roof or on the ground. Solar panel mounts typically account for 10% of the total solar panel installation cost.

How do in-roof solar panels work?

In-roof solar panel mounting systems provide a very aesthetic means of installing panels, by recessing the panels such that they lie flush with the existing roof surface. They can be installed from between 12 to 50 degrees pitch and either landscape or portrait. On a new build the roof can avoid tiling the area where the solar will go.
