# Photovoltaic scaffolding support installation

## Overview

---

Do I need a Scaff tag before PV installation?

Before PV installation: Please email photos of the scaffold including one of the scaff tag to [operations@naked solar.co.uk](mailto:operations@naked solar.co.uk) at least 3 days prior to installation date so that any issues can be ironed out prior to the arrival of our installation team to ensure your install can go ahead on schedule.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

How do solar panels fit on a roof?

The framework will run both vertically and horizontally across the roof, and will support the base of the solar panels. The mounting system makes sure the panels stay in place, while also helping to position the panels at an optimal angle on the roof, which will lead to more sunlight exposure.

Can I install my own solar panels?

It is legal to install your own solar panels – but it's not a good idea, unless you're a certified solar installer. You'll need expertise in roofing and electrical work, as well as specialist equipment and – in most cases – scaffolding.

How do solar panels install?

Your installer will start by placing the solar panels onto the mounting system, without fully securing them just yet. Once they're happy with the angle of the panels, the installer will tighten all the bolts and nuts across the system to secure them in place.

Can solar panels be installed on a loft?

Before an installer is able to crack on with the actual installation, a professional surveyor will need to go into your loft and check the integrity of both the roof and the rafters. This is a key part of the process, as they will assess whether it's safe for you to have solar panels on your roof.

## Photovoltaic scaffolding support installation

---

### Installation Method Statement Rooftop PV panels less or equal ...

The project involves the installation of Photovoltaic (PV) solar panels on the roof of the building, which will have an energy generation capacity of 50kW. The proposed works include: the ...

### Solar Panel Installers & Suppliers , Contact Solar

Contact Solar, UK solar company, provide and install commercial and residential solar panel solutions and battery storage systems. T: Scaffolding included. Award winning installation. No hidden extras. Free Instant Quote. Popular ...
